- Sensory Needs
- Self-Esteem / Empowerment
- Musical Skills

WHAT IS NEUROLOGIC MUSIC THERAPY?

Neurologic Music Therapy (NMT) is an evidence-based treatment model that uses standardized, research-based techniques to treat the brain using music and rhythm.

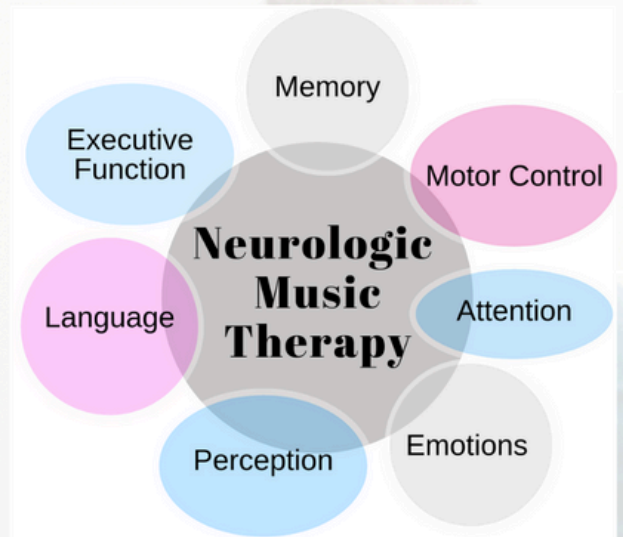

HOW DOES NMT WORK?

Music is an organized structure of sound arranged into melodies, harmonies, rhythms, phrases, etc. Utilizing the natural structure of music, NMT engages and stimulates the whole brain to form new neural pathways to improve skills in language, motor control, attention, memory and much more...

WHO CAN BENEFIT FROM NMT?

Individuals with any of the following:

- Alzheimer's disease
- Autism
- Cerebral Palsy
- Huntington's Disease
- Parkinson's Disease
- Stroke
- Traumatic Brain Injury
- Other neurological diseases affecting cognition, movement and/or communication
